DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I-V, directed to different projection systems, including:

Species I, as illustrated in Figure 21

Species II, as illustrated in Figure 22

Species III, as illustrated in Figure 23

Species IV, as illustrated in Figure 24A

Species V, as illustrated in Figure 24B

Species VI-XV, directed to different devices including the liquid crystal display, including:

Species VI, as illustrated in Figure 25

Species VII, as illustrated in Figure 27

Species VIII, as illustrated in Figure 28A

Species IX, as illustrated in Figure 28B

Species X, as illustrated in Figure 28C

Species XI, as illustrated in Figure 28D

Species XII, as illustrated in Figure 29A

Species XIII, as illustrated in Figure 29B

Species XIV, as illustrated in Figure 29C

Species XV, as illustrated in Figure 29D

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims. In other words, applicant is required to elect one of the species from species I-V and to elect one of the species from VI-XV as identified above.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
